Security Clearance: Delta Green

Directive: Inter-Agency Task Force has been established to deal with "suspected domestic terrorism activity" in Montana. Based off recent data, your team best fits the mission profile and has been activated under legitimate means.

All existing Agents in R-Cell are cleared for Delta Green level operations and thus cleared for full briefing which you will provide.

EPA CID [REDACTED] has been assigned to the Task Force.

Cpt. [REDACTED] MD has been officially attached as a consultant.

Transportation from Travis Airforce base to Malmstrom Air Force Base, Montana, has been arranged. Departure 1:20pm today.

[REDACTED], former USMC, requires cover as a military security contractor. Forge these credentials for this operation and give him official status as an outside consultant into the suspected domestic terrorist group.

Due to the existence of other government agencies, and the necessity to coordinate with

other law enforcement, use of legitimate resources and identification is advised.

Situation Report: Deputy Sheriff Fred Jacob of the Lewis and Clark County Sheriff's Department has died [6 days ago]. Apparently from heavy metal poisoning. His condition was so unusual that the EPA was contacted to determine the source of the poisoning. We have intercepted their initial lab results (and delayed them). It was flagged due to some very unusual medical results. Those results are attached.

False objective: Investigate suspected links to classified domestic terrorism.

Invent whatever narrative the facts support. Initiate false confirmation to allow us to classify this investigation and take it away from the EPA.

True objectives: Discover if Deputy Jacob's death is a result of his investigation into the Unnatural. If so, contain the Unnatural and update A Cell for further instructions. Due to the need for follow-up, a case officer TBD will be assigned and will contact you on your secured phone upon arrival at site.

Support: There is a Green Box located at [GPS coordinates] with equipment to support containment, should the need arise.
